SUMMARY REPORT FT 930-E

commodity basis.

September 1963

FOR RELEASE November 12, 1963

NOV 1963

EXPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States exports of domestic merchandise from \$1,884.6 million in August to \$1,801.4 million in September, a decrease of about four percent, resulted from in September', a decrease of about four percent, resulted from decreases in exports of finished manufactures, semimanufactures, and manufactured foodstuffs, which were partly offset by increases in exports of crude foodstuffs and crude materials. However, the September 1963 domestic merchandise export total was about four percent higher than the September 1962 total of \$1,741.3 million. These totals include data on Department of Defense Military Assistance Program--Grant-Aid shipments.

With Military Assistance Program--Grant-Aid shipments excluded. the September domestic merchandise export total amounted to \$1,765.1 million, about three percent below the August total of \$1,816.0 million but about three percent above the September 1962 total of \$1,710.0 million.

The drop in exports of <u>finished manufactures</u> from \$1,084.1 million in August to \$1,020.4 million in September was primarily

See the September 1963 issue of Report No. FT 900-E for seasonally-adjusted figures on total exports, excluding Military Assistance Program Grant-Aid shipments. Seasonally-adjusted data are not available on a

due to lower levels of exports of aircraft, parts and accessories, from \$101.8 to \$76.1 million; construction, excavating, mining, oil field and related machinery, from \$75.1 to \$65.1 million; power generating machinery, from \$26.9 to \$20.9 million; agricultural machines, implements and parts, from \$16.6 to \$10.6 million; and office, accounting, and computing machines and parts, from \$33.6 to \$27.8 million. However, during the period, exports of automobile parts for assembly and replacement rose from \$56.0 to \$64.3 million. Exports of semimanufactures fell exports of automobile parts for assembly and replacement rose from \$56.0 to \$64.3 million. Exports of <u>semimanufactures</u> fell from \$300.2 to \$270.0 million owing chiefly to decreases in exports of plastics and resin materials, from \$27.0 to \$21.8 million; copper semimanufactures, from \$20.9 to \$16.3 million; industrial chemicals, excluding Special Category Type 1, from \$40.3 to \$35.8 million; and synthetic rubber, from \$15.0 to \$11.7 million. Exports of manufactured foodstuffs decreased slightly from \$123.7 to \$122.2 million.

Small increases in exports of most of the individual items included under <u>crude foodstuffs</u> accounted for the rise in exports of this economic class from \$158.8 to \$165.9 million. Exports of <u>crude materials</u> advanced from \$217.7 to \$222.9 million. This change reflected increases in exports of unmanufactured tobacco, from \$23.3 to \$55.5 million, and unmanufactured contacts. from \$32.3 to \$55.5 million, and unmanufactured cotton, from \$36.7 to \$41.9 million, which were partly offset by a decrease D in exports of oilaeeds, from \$36.8 to \$24.5 million.

EXPLANATION OF STATISTICS

COVERAGE: Export statistics include government as well as nongovernment shipments to foreign countries. The export statistics, therefore, include Department of Defense Military Assistance Program-Grant-Aid shipmenta (for which separate figures are shown in the footnotes of this report), Matual Security Program economic assistance shipments, and shipments of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. (The separate information which is available on exports under P.L. 480 and related laws msy be obtained from the Economic Research Service and the Foreign Agricultural Service of the Department of Agriculture. Shipmenta to United States armed forces and diplometic missions sbroad for their own use are excluded from export statistics United States trade with Pnerto Rico and United States possessions is not included in this report, but the export trade of Puerto Rico with foreign countries is included as a part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries, not entered us imports, is not included in ex-

VALUATION: The valuation definition used in the export statistics is the value at the sesport, border point, or airport of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costa beyond the United States port of exportation are excluded. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data and therefore are audject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all export documents. For the figures shown in this report the sampling variability can be ignored since the probable variability due to sampling is either leas than \$50,000 (the largest variation from rounding of figures) or less than a trivial percentage of the individual totals shown. In addition to the effects of sampling variation, the data in this report are subject to errors from such acurces as the carry-over of data from month to month, errors in reporting or processing, the estimation of shipments valued under \$100 (estimated data for such shipments are included in the over-all export total and in the totals for "Finished manufactures" and "All other finished manufactures, exclusive of Special Category Type 1" hnt excluded from other totals), and the omission of parcel post shipmenta valued under \$50. Although the effect of such errors on the rounded totala in this report is probably small, the possibility of insccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of export data is contained in the foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.
